

I am a professional and experienced sound recordist based in west London, ideally located near the A40, A406, M4, M25, public transport links and I'm able to travel at short notice. I am as comfortable working on large reality set ups that include multiple radio mics, wireless links to camera, multi track recording, talkback and time code sync as I am on single camera documentaries. For more information, please view the website, email or call.
